ANTI-THERMAL/IR GHILLIE SUIT ATGS-17

STEALTH ANTI-THERMAL/IR GHILLIE SUIT ATGS-17 is an all-weather, state-of-the-art signature concealment system that provides protection for snipers, scouts and reconnaissance teams designed by Marines, engineered, and built by Intermat.

It is an advanced material that simultaneously hides objects visually and from detection means such as Night vision & Thermal/IR devices.

It is made of flame resistance impregnated fabric with excellent mechanical properties and resistant to tearing. The fabric is printed with our anti-thermal/IR Ink formulation to give VISUAL, NWIR, SWIR, MIDWIR 3-5 & LWIR 8-14 camouflage & concealment capability.

It is a superior camouflage & concealment product, for Special Operations Units & Law Enforcement Personnel.

ADVANTAGES

Outstanding performance in VISUAL & THERMAL/IR range DUE TO SPECIAL STEALTH INKS applied on top and unlike any other similar suit in the market “Phantom of War” ATGS-17 is not made by insulation materials that block the heat but instead, it is diffusing and scattering the heat emissions away without being sensed by Night Vision, Thermal Cameras and Sensors.

Blends in surrounding like “chameleon”

- Light weight - 1.8Kg, thin and flexible
- Very durable with superior mechanical properties
- Excellent surface finish
- Easy for deployment
- Hand-made and manufactured as per international standards using fire retardant PU materials.
- Made of high-spec, lightweight, durable snug-resistant, quick-drying materials that don't get waterlogged from rain.
- Produced in various camo to blend with different terrains, i.e. woodland, forest, desert, snowing, rocky, and more.
- Set is comprised of hood, Jacket, pants and a storage bag for the system

ANTI-THERMAL/IR, GHILLIE SUIT ATGS-17 concealment system shall be worn above regular military battle dress uniforms or other technical, tactical garments and equipment worn or carried by the system operator.
